

Connecticut Energy Efficiency Fund

2006 Commercial and Industrial Programs

Programs	Eligibility	Incentive	Program Features
Energy Conscious Blueprint	New Commercial and Industrial (C&I) construction, planned remodeling and major renovations.	Up to 100% of incremental cost.	Equipment, system and design incentives for installation of energy-efficiency measures.
Energy Opportunities	All C&I customers.	Up to 100% of incremental cost or up to 50% of installed cost.	Focused studies available for specific projects. Cash incentives for cost-effective energy-efficiency upgrades. Implementation is by the customer.
Express Rebate Services	All C&I customers-- Lighting: upgrades only; Motors: up to 200 HP; HVAC: up to 30 tons.	Prescriptive rebates paying up to 100% of incremental costs.	Simple, quick application process.
Operation and Maintenance (O&M) Services	All C&I customers.	Incentives up to 100% of installed cost (See your utility for details).	Energy-saving maintenance procedures and energy-efficiency modifications to existing systems. Focused studies and training are available (See your utility for details).
Small Business Energy Advantage	All C&I customers, including municipalities, with up to 200 kW (CL&P) or 150 kW (UI) of average peak demand.	Interest-free financing and prescriptive incentives up to 50% of the installed cost for Lighting, HVAC, and Refrigeration measures. Lighting: 50% of installed cost; HVAC: Prescriptive O&M Incentives; Refrigeration: 50% of installed cost.	On-site assessment and installation of cost-effective electric energy measures. Interest-free loans for qualified customers for the balance of project costs.
Conservation and Load Management Financing	Small business customers (200 kW (CL&P) or 150 kW (UI)) and municipalities.	Interest-free financing.	Maximum of \$100,000 for implementing cost-effective energy-efficiency projects (See your utility for details).
Small C&I Conservation Loan (CL&P only)	Commercial customers with average kW demand of 350 kW or less, or industrial customers with less than 100 employees.	Interest-free financing.	Interest-free loan at \$5,000 minimum up to a maximum of \$100,000 per customer for energy-efficient equipment replacements only.
ISO-NE Load Response Program Support	All C&I customers with at least 100 kW of curtailable load.	Incentives are paid for curtailment when requested. Higher payments are available for 30 minutes and two hour demand reduction.	Maintain the ability of existing participants to reduce load during periods of system capacity deficiency.
Demand Reduction (CL&P only)	C&I customers who are capable and willing to control kW demand during peak times through real-time monitoring and control.	Incentives can be up to 50% of installed cost, or up to \$500 per output control point (\$1,000 for SWCT customers).	Incentives for cost-effective projects which provide peak load kW (or kW and kWh) reductions in commercial, industrial and large residential complex applications.
Power Factor Improvement (CL&P only)	CL&P customers who are provided electricity through Rate 58 tariff who have a 12-month average power factor below the approved qualification threshold.	Incentives up to 50% of installed cost to improve power factor to the rate average power factor (0.898 for Rate 58). Absolute cap of \$60/KVAR.	Provide technical and financial incentive support to improve power factor at qualifying facilities.

Call 1.877.WISE.USE (1.877.947.3873) for additional information.

Connecticut's Energy Efficiency Programs are funded by the Conservation Charge on customer electric bills.
